

# Valan A6

## Wireless Concrete Speaker

Valan A6 loudspeakers have classical plain design and excellent quality of sound. Concrete has outstanding properties for speaker building. Its mass does not vibrate in the rhythm of the music.

All devices with Bluetooth sender or headphone output are suitable sound sources. Cellphones, tablets, computers or TV-sets for example. The speaker of the local WiFi-network is one of the uses.

Enjoy streamed music and radio.  
Listen to improved sound quality of your existing devices.  
Connect wirelessly or with cable.

The handle is made of natural color leather.

Stamped custom logos are available on request.

### Colors and Measures

A6 Speaker is made of white concrete. The color of the grill is RAL 9002 Grey White. Other concrete and grill colors on request. The measures of the concrete part are 205x205x107mm. The weight of the speaker is 7.1 kg.

The transportation package is made of birch plywood. The measures are 274x274x204 mm and the weight 9.9 kg.
